DETAILED ACTION

1. Claims 1-31 are pending in this application filed 03/27/01.
2. The IDS filed 05/21/01 has been entered.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a system for providing ATM services, classified in class 705, subclass 43.
 - II. Claims 18-31, drawn to a method for an ATM services provider maintaining at least two of the ATM's, classified in class 705, subclass 39.

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination in Group II has separate utility such as the provider maintaining at least two of the ATMs, making contact with the financial institution to provide the ATM services, and charging the financial institution an access fee for accessing the ATM network and collecting an interchange fee for each transaction. Group I has separate utility such as the provider providing the ATMs, the financial institution contracting with the ATM service provider to provide the services to its customers, and the service provider generating revenue by charging and collecting a fee. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ella Colbert whose telephone number is 571-272-6741. The examiner can normally be reached on Tuesday-Thursday, 6:30AM-4:00PM.
